

What is happening in Estonian education?

Exploring the impact of digital learning and technological innovations

Part of the Summer School “Digital Childhoods”, this online guest talk explores Estonia's current educational landscape, focusing on the integration of digital learning tools and innovations in schools and education, and their impact on childhood development and learning outcomes.

■ **Omari LOID** is a former teacher, co-founder and CEO of Praktikal, an Estonian edtech organization dedicated to science, technology, engineering, and mathematics (STEM).
