## Guide to identify the modules in eKVV

### Module title and key

### Module elements

Each module is divided into "subcategories" (Modulelemente). In order to complete the module you must take a class from each subcategory.

The module elements do not vary from one semester to the next; however, the course catalogue does change.

Sometimes the same class may be listed under several modules or several subcategories of a module. However, you can only make it count once.
